EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The specification has been amended as follows:

Page 1, line 1, insert: This application is a divisional application of U.S. Application No. 09/429,148 filed 10/28/1999, now U.S. Patent No. 6,328,922.

Page 10, line 13, after "U.S. Patent Application Serial No.", insert: 09/428,932, now U.S. Patent No. 6,652,691 ;

Page 11, line 16, after "in the name of Yu et al.," insert now U.S. Patent No. 6,074,504;

Page 12, line 13, after "in the name of Grabowski et al.," insert now U.S. Patent No. 6,056,839.

Allowable Subject Matter

2. Claims 11, 17-20, 22-24, and 26 are allowed over the prior art of record.
3. The following is an examiner's statement of reasons for allowance:

Mammino et al (5,552,005) disclose an apparatus for forming a flexible imaging sheet, comprising a lower support member, a heating element (72) having a heatable flat surface which has a width of about 6mm (1/4 inches; col. 10, lines 62-65), means (76) for moving the heating strip toward and contact the flexible sheet (10; col. 11, lines 9-12), a welding tool (142) and a

heatable finishing roller (145) for welding and finishing the end regions (12, 14) of the flexible member (10); wherein the welding tool and the heatable finishing roller is movable transversely across the seam region.

However, Mammino et al fails to disclose a rotatable compression wheel.

Nelson (5,087,495) teaches an apparatus for transferring xerographic images, comprising a pair of pressure elements, a pair of rotatable compression wheel (71, 75) having a Teflon surface parallel to the surface of the lower support member (col. 5, lines 66-68), wherein the lower support member and the upper heatable strip are directly contact the flexible imaging transfer sheet (Figs. 4-5).

However, Nelson fails to disclose a separate upper heatable strip having a smooth lower heatable flat surface in addition to the pressure rollers.

The combination of these references would not resulted in an apparatus for post treatment of al already welded seamed flexible imaging belt, comprising a smooth heatable strip in between the belt and the wheel in order to prevent protrusion, cracking and delamination to the welded belt during the compression process of the wheel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
